Thulanjana Pramod

Software Engineer | React, TypeScript, Node.js, Python

Lisbon, Portugal | +351 965 617 062 | thulanjana1125@gmail.com | linkedin.com/in/thulanjana | thulanjana.vercel.app

SUMMARY

Software Engineer with over 4 years of experience building full-stack web applications, with a strong focus on React and TypeScript on the frontend and Node.js and Python (FastAPI, Django) on the backend. Has built products for telecom, fintech, data governance, charity and energy clients, including Siemens Energy, and worked across AWS, Azure and GCP, including a full platform migration from AWS to GCP. Cares about frontend performance, clean and maintainable code and solid test coverage with Jest, React Testing Library and pytest. Holds a First Class Honours degree in Software Engineering.

TECHNICAL SKILLS

Frontend Architecture & UI	React (v15–19), TypeScript, JavaScript, Next.js, TanStack Query, TanStack Table, Redux, Zustand, Tailwind CSS, Radix UI, Material UI, Angular 12, RxJS, Vite, Webpack, Sass, SCSS, HTML5, Bootstrap
Backend Services & APIs	Node.js, Express.js, TypeScript, REST APIs, GraphQL, Python (FastAPI, Django, Flask), Celery, SQLAlchemy, PHP 8 (Laravel, WordPress), Microservices, YANG Data Modelling
Databases & Streaming	PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Kafka, Avro, AWS SQS
Cloud, DevOps & Infrastructure	AWS (EC2, S3, Lambda, API Gateway, RDS, CloudFront, SQS, ECR, IAM, CloudWatch), GCP (Cloud Run, GKE, BigQuery, Cloud Storage, Artifact Registry), Microsoft Azure, CI/CD, Docker, Kubernetes, Terraform, ArgoCD, Jenkins, Bitbucket Pipelines, Git
AI & Data Engineering	Claude API, OpenAI API, LLM Integration, Model Context Protocol (MCP), Datadog, pandas, PyMC
Testing & Quality Assurance	Jest, React Testing Library, Vitest, Supertest, pytest, TDD, BDD, Integration Testing
Architecture & Core Practices	Frontend Performance, Clean Architecture, Design Systems, OIDC and JWT Auth, Repository Service Pattern, Agile (Scrum)

PROFESSIONAL EXPERIENCE

Software Engineer *Sep 2025 - Present*

Opplane (Portugal)

- Build React, Next.js and TypeScript frontends backed by Node.js and Python (Django, FastAPI) services for telecom, fintech and data governance clients.
- Contributed to moving the whole platform from AWS (Lambda, S3, SQS, ECR) to GCP (Cloud Run, GKE, BigQuery, Cloud Storage, Artifact Registry), including Bitbucket Pipelines that publish container images and sync runtime config.
- Designed and extracted JudgeKit, a domain-agnostic Python library that uses Bayesian IRT models (PyMC) to calibrate quality scores from multiple LLMs across large datasets.
- Built REST, GraphQL and MCP endpoints, including a FastAPI service combined with a stateless MCP agent, giving the frontend, microservices and AI workflows a single API layer.
- Built resumable async batch jobs on Cloud Run, BigQuery, and Cloud Storage, keeping heavy scientific dependencies in their own container images.

- Wrote a framework-agnostic audit trail library for SQLAlchemy and Django that records data changes at the session flush layer.
- Maintain 500+ automated tests across pytest, Jest and React Testing Library, and set up Datadog monitoring and error alerting.
- Lead code reviews and take part in sprint planning and architecture documentation in Scrum teams with UI/UX and backend engineers.

Web Developer *Dec 2023 - Sep 2025*

Fat Beehive (UK)

- Built responsive React and TypeScript applications for enterprise clients including Siemens Energy, and a reusable frontend setup used across 30+ UK platforms.
- Built REST APIs with Node.js, Express and TypeScript and connected them to the frontend using test-driven development. Also customised PHP and headless WordPress backends.
- Wrote unit and integration tests with Jest, React Testing Library and Supertest, which made releases faster and more reliable.
- Improved Core Web Vitals, responsiveness and load times through better asset bundling, Sass refactoring and modern JavaScript.
- Wrote Python scripts to speed up data processing and improve content extraction and search across large websites.
- Deployed and maintained applications on AWS (EC2, S3, CloudFront, Lambda, API Gateway, RDS, CloudWatch, IAM) across development, staging and production environments.

Junior Web Developer *Aug 2023 - Dec 2023*

Fat Beehive (UK)

- Delivered UI improvements, performance upgrades and bug fixes on major UK charity websites using React, TypeScript and Sass.
- Built custom features with TypeScript, PHP and SQL, including Twilio integrations.
- Wrote Node.js and Python scripts for data imports and routine maintenance tasks.
- Diagnosed and fixed processing issues on UNIX and Windows servers, reducing downtime.

Application Support Engineer *Aug 2021 - Jul 2023*

IIHRM (Sri Lanka)

- Developed and maintained Angular 12 and React frontends in TypeScript (RxJS, Material UI) for enterprise online assessment tools.
- Built and maintained backend services with Node.js, TypeScript and MySQL.
- Deployed and supported applications on Microsoft Azure and AWS (EC2, S3, RDS, CloudWatch).
- Provided end-to-end support across frontend and backend, documented the ticket triage process, and tuned slow database queries that handled large volumes of data.

EDUCATION & CERTIFICATIONS

BSc (Hons) Software Engineering, First Class Honours
University of Wolverhampton, UK (2020 - 2023)

Certifications
● Anthropic: Building with the Claude API, Introduction to Model Context Protocol, Claude Code in Action, Introduction to Agent Skills (2026)
● HackerRank: Angular, JavaScript, Problem Solving (2024)
● LinkedIn Learning: React.js Essential Training, JavaScript Essential Training (2024)

Languages
English: Professional working proficiency (C1) | Portuguese: Basic (A1)
